# Lucas Jessop

(435) 212-1134 | jessop.lucas@gmail.com | [Github](#) | [LinkedIn](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Experienced Full Stack Web Developer with a passion for creating interactive websites. Excels in HTML, JavaScript, CSS, and many other website related languages. Detail oriented, organized, works at a fast pace to meet deadlines.

## TECHNICAL SKILLS

Javascript | React | Redux | NodeJs | Express | PostgreSQL | Massive | AWS | CSS | SASS | Git | Github | Postman | SQL Tabs | Heroku | HTML5 | Tailwind | Next | Storybooks | TypeScript | Docker

## PROFESSIONAL EXPERIENCE

**Frontend Software Engineer (Hybrid / Remote)** - [Exploro.com](#)          *August 2022 - June 2023*

*React | Redux | NodeJS | Next | PostgreSQL | CSS | Tailwind | Storybooks | Docker*
- Responsible for creating most core front end React components using Tailwind, and Storybooks.
- Worked with a backend team to retrieve data from the database and display it on exploro.com
- Obtained more in depth knowledge regarding readable and scalable code through training with a mentor of mine to produce the cleanest code possible.

**Scrum Master (Hybrid)** - [Exploro.com](#)

*Agile | Jira | Google Calendar*
- Managed meetings, and led our dev team through sprints using Agile methodologis as a Scrum Master.
- Refined my knowledge on full stack programming, by taking an online course through Udemy to eventually grow into a web developer position while also working as a Scrum Master.
- Learned about the duties of a scrum master through training to lead our team through sprints.

***Web Developer / Software Engineer* (Remote)** *(student)* - Devmountain          *October 2020 - January 2021*
*Javascript | CSS | HTML | React | Redux | NodeJS | Express | PostgreSQL*
- Developed multiple full stack applications, using a myriad of tools to further develop my full stack skills.
- Learned how to develop a finished product, by writing industry standard code with a team of developers.
- Utilized Google to teach myself things I did not know in order to produce more effective, and efficient code.

***Stage Technician* (On Site)** - Hale Centre Theatre (Sandy)          *November 2020 - September 2022*
- Managed lighting using pre planned lighting procedures to provide a consistent audience experience
- Collaborated with a team by collecting constructive feedback, interpersonal communication, and root cause problem solving for an improved work environment and to improve company culture
- Interpreted desired lighting cues through regular practice and continued learning to achieve professional goals.

## PROJECTS

**Pokemon Fighters** - [Github Repo](#) | *React | Redux | NodeJS | Express | PostgreSQL | CSS | PokeAPI | Netlify*

**DnD Find Me** - [Github Repo](#) | *React | Redux | NodeJS | Express | PostgreSQL | SCSS | Google maps API | Twilio*

**Monkidex** - [Github Repo](#) | [Demo Video](#) | *React | Redux | NodeJS | Express | PostgreSQL | CSS*

## EDUCATION

**Web Development Program** - Devmountain - Lehi, UT          *Graduated January 2021*
